## BI-METAL HOLE SAWS

Bordo bi-metal hole saws are premium quality, general purpose saws suitable for a wide variety of materials and applications. The high-speed steel cobalt (HSS-Co) cutting edge provides shock resistant teeth and resists tooth strippage. 4/6 positive tooth configuration allows for fast, smooth cuts and less vibration.

## FEATURES

- HSS-Co Cobalt cutting edge.
- 4/6 variable tooth configuration.
- 48mm (1-7/8") depth of cut.
- 5mm (3/16") thick heavy-duty backing plate eliminates need for drive plate.

### RIPPER HEAVY DUTY TUNGSTEN CARBIDE TIPPED HOLE SAWS

Ideal for cutting timber and all types of composite board, particularly MDF. Ripper hole saws are also suitable for cutting wood laminates, plywood, insulation and fibre cement sheet.

#### FEATURES

Heavy duty abrasion resistant tungsten carbide teeth will cut materials that quickly dull normal hole saws. Heavy duty construction for long life with large gullets for easy slug removal.

### TUNGSTEN CARBIDE HOLE SAWS

XP TCT hole saws are ideal for repetition cutting in steel plate, stainless steel plate and synthetic resin plates up to 4mm thick. XP2 TCT hole saws feature 3 edged cutters which balance the cutting effort for smoother boring, greater control and reduced drag. The deep body makes them ideal for use with curved surfaces such as metal pipes.

#### FEATURES

Extremely long service life.  
No need for messy cutting fluids.  
Heavy duty plug ejector spring.

### HSS ANNULAR CUTTERS

Annular Cutters achieve burr-free finished holes without the need for pre-drilling or step drilling. Faster and more accurate than using standard HSS twist drills. Bordo Annular Cutters are CNC ground and feature multi-cut geometry for smooth and fast cutting. The precision ground flutes run the entire length of the cutter providing efficient chip removal.

#### FEATURES

Extended tool life.  
Close tolerance drilling without runout.  
Reamed quality, burr free finished holes.  
Universal shank suits all popular machines.

### THINWALL SHEETMETAL HOLE SAWS

Ideal for the electrical and plumbing tradesman. Each hole saw has a thin 0.65mm sidewall blade thickness, which allows for faster cutting and longer battery life. Ideal for chargeable impact drivers. Smooth and fast cutting — especially designed tooth geometry assures increased performance and better wear resistance.

#### FEATURES

M42 material with special variable pitch tooth design for smoother cuts in sheet metal.  
Self ejecting plug removal.  
1/4" quick change shank, ideal for use with battery operated impact drivers.  
Safety collar stop helps prevent cutting too deep, and prevents damage to wires when drilling into electrical boxes.

### HSS-M2 118° SPLIT POINT

Split point is self centering and reduces the need for end thrust. Friction at workpiece is reduced. 118° point angles are ideal for use in materials such as mild steel and cast iron. The 118° point creates easily controlled chips which are wide and thin. Bright finish tools have no surface treatment and are supplied in the as-ground condition. These tools are suitable for general purpose use, particularly for non-ferrous applications.

### HSS-Co5 (COBALT) 135° SPLIT POINT

The 135° point provides superior performance in harder steel materials especially in deep hole applications. In these situations it will produce thicker chips minimising work hardening of the cavity. Faster penetration reduces abrasion and friction along the cutting edges. Cobalt HSS drills are extremely hard and provide superior performance and increased tool life especially in stainless steel and high tensile steel.

### HSS-M2 118° SPLIT POINT

Split point is self centering and reduces the need for end thrust. Friction at workpiece is reduced. 118° point angles are ideal for use in materials such as mild steel and cast iron. The 118° point creates easily controlled chips which are wide and thin. Black finish tools are generally recommended for ferrous applications where the oxide layer aids chip flow and heat dissipation.

### HSS-M2 DELTA POINT ~ DRILLS FASTER, LASTS LONGER

The Delta Point drill bit is completely unlike traditional chisel point and split point drill bits. Delta Point drills have a multi-faceted cutting tip. The overall length of the cutting edge of Delta Point significantly exceeds that of conventional split point drills of comparable size. Although the final design might look complicated the results are simply extraordinary.

### HIGH CARBON FAST CUT SPADE BITS

Bordo fast cut spade bits are ideal for creating holes in a wide variety of timbers.

- Low cost per hole.
- Fast starting.
- Heavy duty shank prevents bending.
- Hex shank prevents slippage in chuck.
- Hex shank ensures a positive lock in spade bit extensions.

## rapidcut®

- Ultra thin kerf for faster, effortless cuts.
- Tru-plate fully hardened and tempered steel body is precision balanced to run truer.
- High performance diamond ground carbide for improved cutting efficiency – sharper for longer!
- Nano-shield coating reduces friction for reduced saw load, resists gumming keeping blade cooler and extending blade life.

## tradecut®

- Heavy duty anti-kickback tooth shoulders which provide optimum support to the cutting tips ensuring maximum performance, extended blade life and safer cutting.
- Fully hardened and tempered steel body resists warping even in the most demanding applications.
- High performance diamond ground carbide for improved cutting efficiency – sharper for longer!

## multicut®

- Extreme performance titanium carbide metal cutting teeth provide long blade life.
- Cuts multiple materials including timber, ferrous metal, non-ferrous metal and plastics.
- Cool cutting, no heat, no burrs and minimal sparks when cutting metal.
- Dust free metal cutting. Unlike abrasive cutting wheels multicut blades create chips not dust.

## BORDO IMPACT SCREWDRIVER BITS

Bordo Impact Bits are designed and manufactured for optimum performance in modern impact drivers. Not only do they offer significantly increased bit life in impact applications but they also offer exceptional performance in standard driving usage. The impact driver action places high peak torque demands on both insert and power bits. Our range features a uniquely engineered torsion zone with multi-stage hardening and tempering to dissipate damaging peak loads.

Many manufacturers spruik the benefits of their "high torque", "torsion" and "impact" bits. The vast majority do not live up to the hype. Bordo Impact Bits significantly outperform those of our competitors.

## M2-HSS HEX SHANK JOBBER DRILLS

Specifically engineered for use in impact drivers these bits are also fully compatible with conventional rotary drills. 1/4" hex shank facilitates fast tool loading in cordless impact drivers and quick change adaptors.

One piece solid core design is significantly more durable than the conventional two piece design that utilises a hex sleeve on a standard round drill bit.

135° split point delivers a precision start and prevents bit wander for fast, accurate holes. Premium quality M2 HSS ensures extreme performance and long bit life.
