**INDUSTRIAL PORTABLE FUME COLLECTORS**

- HEPA Filters
- Portable with castors & brake function
- Fume arm 360° rotation
- Purification of welding & grinding fumes & dust

Welding fumes – fine metal particles produced through welding that can be breathed in – have been classified as carcinogenic. This means employers in mining and other industries where welding takes place must make sure workers are protected, for example by installing welding fume extractors.

## THE RISK IS REAL ... PROTECTING YOURSELF IS EASY!

A number of Australian companies are now changing their stance on PPE for welders after the reclassification of welding fume by the International Agency for research on cancer. Many companies are strengthening their controls by enforcing the use of welding Powered Air Purifying Respirators (PAPR's) to reduce welding fume exposure to "As Low As Reasonably Practicable."
