

## CORDLESS TUNGSTEN GRINDER

The Sharpie DXCL™ tungsten electrode grinder with high-quality Milwaukee M12 Cordless Motor. The machine has an adjustable grind angle from 15° - 45° for virtually any TIG welding application.

Part No.  
**STG - Tungsten Grinder**

Sharpie grinders deliver quick and consistent electrode grinds for snappy arc starts, better puddle control and improved weld quality. The double-sided diamond wheel easily grinds tungsten electrode sizes, .040", 1/16", 3/32" and 1/8" (1.0mm, 1.6mm, 2.4mm and 3.2mm)

### Tip Flat Option:

Tungsten electrodes ground to a sharp point are proven to burn off and cause inclusions in your weld. By Removing the point & adding a tip flat, you get better arc starts, longer electrode tip life & reduced weld contamination.

### Cut-Off/Score Option:

The built-in cut-off or scoring option allows you to cut & remove only contaminated portions of the electrode. No more bending or breaking electrodes which causes splintering of the tungsten, reducing electrode performance.

### Save Time & Money:

Diamond ground electrodes reduce tungsten consumption and waste. Stop wearing out belts on your sander & grinding deep grooves in your bench grinder wheels. The reversible long-life diamond wheel means low replacement part costs.

### Arc-Zone Pro Tip:

Frequently re-grinding worn electrode tips improves weld quality & lowers tungsten usage.

**INDEPENDENT WHOLESALE WELDING SUPPLY**
